Review Frequency

This document shall be reviewed at least every 12 months, or sooner following a significant incident, change of operations, vessel modification, or change in applicable legislation.

Controlled Distribution

This document is a controlled distribution issued from the Franmarine document management system (DMS), which holds the master record, revision history, and approval log. The controlled digital copy is located in the vessel's SharePoint folder. Printed or downloaded copies are uncontrolled; refer to the SMS Document Register for the current revision status.

1. CREW INDUCTION AND FAMILIARISATION

All crew must receive induction before commencing duties (Schedule 1, Clause 9), covering: vessel layout; safety equipment; emergency procedures and duties; assembly station; SMS access; D&A policy (FRA-POL-008 Fitness for Work Policy); fatigue management; reporting; comms; EX40 conditions; vessel-specific procedures (winch, dive spread, equipment).

Each vessel is fitted with a QR code that links to the vessel-specific induction form. Crew and special personnel must scan the QR code and complete the digital induction form before departure. The QR code is displayed at the helm station.

2. SPECIAL PERSONNEL INDUCTION

Special personnel must complete the vessel induction via QR code before departure, covering emergency procedures, safety equipment, assembly stations, lifejackets, and the D&A policy (FRA-POL-008 Fitness for Work Policy).

3. PRE-DEPARTURE / PRE-START

Each vessel is fitted with a QR code for the vessel-specific pre-start checklist. The master must scan the QR code and complete the digital pre-start form before each departure. A physical logbook is also maintained onboard each vessel for manual entries and backup.

4. EMERGENCY DRILLS

Drills conducted at a frequency determined by the risk assessment (Schedule 1, Clause 9(4)). Drills must test the emergency procedures in FUS-SMS-INT3-06 and cover the use of the vessel's lifesaving equipment.

4.1 Minimum Drill Frequencies

Fire drill — monthly. Person overboard drill — monthly. Medical emergency drill — quarterly. Abandon vessel drill — quarterly. Flooding and damage control drill — quarterly. Diving emergency drill — prior to each diving operation or monthly during active dive campaigns.

4.2 Drill Conduct

All drills shall be conducted by the master or a competent crew member (Schedule 1, Clause 9(6)). Drills shall be realistic and scenario-based where practicable. Following each drill, the master shall record the outcome, any deficiencies identified, and corrective actions taken.

4.3 Drill Records

Each drill shall be recorded using the Emergency Drill Record Form (FUS-SMS-INT3-04B). A blank copy of this single-page form is maintained as Addendum 04B. Completed forms shall be stored in the SMS drill records folder and retained for a minimum of 5 years. Each completed form must include: the date; drill type; description of the scenario; names and signatures of all participants; outcome and any deficiencies; and corrective actions taken (Schedule 1, Clause 9(7)).

5. TRAINING AND DRILL RECORDS

Records retained for a minimum of 5 years (Schedule 1, Clause 9(7)). The following addendums are maintained independently and may be updated without revising this document. FUS-SMS-INT3-04A is the induction register. FUS-SMS-INT3-04B is a blank single-page Emergency Drill Record Form — print and complete one form per drill, and store completed forms in the SMS drill records folder.
