Review Frequency

This document shall be reviewed at least every 12 months, or sooner following a significant incident, change of operations, vessel modification, or change in applicable legislation.

Controlled Distribution

This document is a controlled distribution issued from the Franmarine document management system (DMS), which holds the master record, revision history, and approval log. The controlled digital copy is located in the vessel's SharePoint folder. Printed or downloaded copies are uncontrolled; refer to the SMS Document Register for the current revision status.

TABLE OF CONTENTS

1. PURPOSE

This emergency plan is recorded in writing and kept onboard (Schedule 1, Clause 12). Each emergency procedure is maintained as a separate addendum and may be updated independently. Individual jobs will also have a job-specific Emergency Response Plan (ERP) that the supervisor must be familiar with.

2. ASSEMBLY STATION

The primary assembly station on MV Rohani is the aft deck, clear of obstructions. The vessel's risk assessment (FUS-SMS-ROH-02, Section 8) has determined that the provision of a defined alternative assembly station is not practicable due to the size and layout of the vessel (10.80 m aluminium hull, open deck layout). In an emergency, all persons shall muster on the aft deck and the master shall conduct a verbal roll call to confirm all persons are accounted for.

If the aft deck is compromised (e.g. by fire), persons shall move to whichever area of the vessel is safest and prepare to abandon vessel if necessary. An inflatable liferaft sufficient for all persons on board is the designated survival craft.

2.1 Emergency Role Assignments

The following table assigns emergency duties to each crew position in accordance with Schedule 1, Clause 12(4)(c). Crew numbers vary by operation (refer FUS-SMS-ROH-03). The master shall brief all crew on their emergency roles before departure.

Role	Emergency Duties
Master	Takes overall command. Issues distress or urgency calls on VHF Ch 16. Conducts head count and verbal roll call. Directs emergency response. Activates EPIRB if abandoning vessel. Makes decision to abandon or fight. Navigates vessel to safety if underway.
Crew Member 1 (if present)	Deploys firefighting equipment or lifebuoy as directed. Administers first aid. Assists with damage control (bilge pumps, plugs). Prepares lifesaving equipment for deployment (liferaft/dinghy, SOLAS lifejackets from wheelhouse). During diving emergencies, acts as standby diver or assists with diver recovery.
Crew Member 2 (if present)	Maintains visual lookout and points at person overboard (if applicable). Assists with firefighting, damage control, or first aid as directed by master. Musters and accounts for special personnel. Assists with preparation of lifesaving equipment.
Crew Member 3 (if present)	Supports duties of Crew Member 1 or 2 as directed. During diving operations, may act as standby diver rescue or surface communications relay. Assists with abandon vessel preparations if required.

When operating with master only (enclosed water transit), the master assumes all emergency duties. Special personnel shall follow the master's directions and assist only as directed.

3. EMERGENCY CONTACTS

Service	Number
Emergency Services	000
Marine Rescue NSW (VHF)	VHF Ch 16
Marine Rescue NSW (phone)	02 9471 8300
