Review Frequency

This document shall be reviewed at least every 12 months, or sooner following a significant incident, change of operations, vessel modification, or change in applicable legislation.

Controlled Distribution

This document is a controlled distribution issued from the Franmarine document management system (DMS), which holds the master record, revision history, and approval log. The controlled digital copy is located in the vessel's SharePoint folder. Printed or downloaded copies are uncontrolled; refer to the SMS Document Register for the current revision status.

TABLE OF CONTENTS

1. PURPOSE

This document establishes the planned maintenance system for MV Rohani in accordance with Marine Order 504 (2024), Schedule 1, Clause 14.

2. PREVENTATIVE MAINTENANCE SYSTEM

All preventative maintenance for MV Rohani is managed through MaintainX, a digital maintenance management system. MaintainX contains all of MV Rohani's assets, service intervals, maintenance history, and work orders.

The East Coast Operations Superintendent is responsible for ensuring that all scheduled maintenance is completed on time and recorded in MaintainX. The master shall report any defects or maintenance requirements identified during operations.

3. MAINTENANCE SCHEDULE

The following asset categories and their maintenance requirements are managed in MaintainX:

- Engines — 2 × Detroit Diesel 6V-92T diesel inboards, serviced per the manufacturer's schedule (oil, filters, coolant, raw-water impellers, anodes); deck crane — UNIC UB-V504J, annual inspection and service.
- Hull — aluminium hull inspection, antifouling, anodes, skin fittings.
- Steering — hydraulic fluid, hoses, linkages.
- Electrical — batteries, wiring, switches, navigation lights.
- Bilge pumps — 3 x power-driven pumps (forward, aft, engine room), function test in automatic and manual.
- Navigation and communications — chart plotter, echo sounder, GNSS, VHF radio.
- SSBA dive spread — per AS/NZS 2299.1:2015 requirements.
- Fuel system — tank, lines, filler cap, filters.
- Ground tackle — anchor, chain, warps.

Detailed service intervals, procedures, and checklists for each asset are contained within MaintainX.

4. SAFETY EQUIPMENT SERVICING

Equipment	Interval	Provider
EPIRB	Per manufacturer / AMSA	Approved agent
Liferaft / Dinghy	Per manufacturer	Approved agent
Fire extinguishers (9.0 L foam AB + 4.5 kg DCP ABE)	Annual	Approved agent
Lifejackets (SOLAS + auto-inflate 150)	Annual	Master / approved agent
Flares	Before expiry	Owner
First aid kit (per first aid risk assessment)	Annual or as used	Master
Spill kit	Quarterly or as used	Master
Oxygen administration kit	Per manufacturer	Approved agent

All safety equipment servicing is tracked in MaintainX with automated reminders for upcoming service dates.

5. DEFECT REPORTING

Defects identified during operations are reported through the defect report section of the QR code pre-start form (Microsoft Forms). This digital system captures:

- Date and time the defect was identified.
- Description of the defect.
- Name of the person reporting.
- Job number.

Defect reports submitted through the QR code form are received by the East Coast Operations Superintendent, who will raise a corrective work order in MaintainX. Critical defects that affect the safety of the vessel or persons onboard shall also be reported verbally to the East Coast Operations Superintendent immediately.

The vessel shall not continue to operate with any defect that compromises the safety of persons onboard unless a risk assessment has been completed and interim controls are in place.

6. RECORDS

All maintenance records, service history, and defect reports are retained in MaintainX. The physical vessel logbook also records maintenance activities completed onboard.
