Review Frequency

This document shall be reviewed at least every 12 months, or sooner following a significant incident, change of operations, vessel modification, or change in applicable legislation.

Controlled Distribution

This document is a controlled distribution issued from the Franmarine document management system (DMS), which holds the master record, revision history, and approval log. The controlled digital copy is located in the vessel's SharePoint folder. Printed or downloaded copies are uncontrolled; refer to the SMS Document Register for the current revision status.

TABLE OF CONTENTS

1. PURPOSE

This register records all vessel-specific inductions completed for personnel operating on or embarking MV Seagull. It may be updated independently without revising the parent document FUS-SMS-SGL-04.

The vessel-specific induction is delivered via a QR code linked to the vessel's induction form. Completion of the QR code induction is recorded digitally. This register serves as the physical backup and cross-reference.

2. INDUCTION REQUIREMENTS

2.1 When Induction is Required

- Prior to any person's first trip on the vessel.
- Following any significant modification to the vessel, its equipment, or operating procedures.
- When crew have been absent from the vessel for a period exceeding 6 months.
- When new emergency equipment or procedures are introduced.

2.2 Induction Content

The vessel-specific induction covers the following topics as a minimum:

- Vessel layout, access points, and means of escape.
- Location and operation of all safety equipment (PFDs, fire extinguishers, flares, first aid kit).
- Location and operation of the VHF radio and distress procedures.
- Person overboard procedures and recovery equipment.
- Fire and emergency response procedures.
- Vessel-specific hazards and risk controls.
- Operational limitations and weather criteria.
- Drug and alcohol policy (FRA-POL-008 Fitness for Work Policy).
- Fatigue management requirements.
- Reporting of hazards and incidents.

2.3 QR Code and Physical Logbook

Each vessel has a QR code displayed at the boarding point which links to the vessel-specific induction form (Microsoft Forms). Completion is recorded digitally and results are accessible to the East Coast Operations Superintendent.

A physical logbook is also maintained onboard as a backup record. Both records shall be kept current and reconciled during SMS reviews.
